

Environmental Education Workshop: Leopold Education Project (LEP)

The LEP curriculum, Lessons in Land Ethic, is an innovative, interdisciplinary conservation ethics curriculum targeted for grades 6 – 12. The LEP increases student’s awareness of the land and informs them of how to make responsible choices for our planet, while simultaneously teaching important social, collaborative and critical thinking skills. The LEP is unique in that it uses a classic environmental literary work, Leopold’s A Sand County Almanac, to reach students with a conservation message that strives to instill an appreciation for the land community. Please join Baylor University’s Center for Reservoir and Aquatic Systems Research and the Lake Waco Wetlands in exploring the LEP with **Amanda Patrick**, Environmental Education and Outreach Specialist with the U.S. Fish and Wildlife Service.
